

Live Demo Maker Tutorial

Live Demo Tutorial

Live Demo make is a small web based tool to allow users to quickly see demos of the Plugin which they wish to use . It mainly requires two parametes one a alias which is the wordpress alias for the plugin , and nother not required but recommended a url where users will land on after logging in .

For example we want to add a demo for

For ex - Coupon Creator Wordpress URL is - <https://wordpress.org/plugins/coupon-creator/> So alias will be - coupon-creator

So Demo url will be - <https://www.wpoven.com/tools/try/plugin/coupon-creator>

This will land users in default page , better is to log into the settings page of coupon-creator , so once you log in find the settings page after removing (wp-admin/)

Setings page for above url - edit-tags.php?taxonomy=cctor_coupon_category&post_type=cctor_coupon

We not have to base 64 encode it , use the following tool -

It will become -

ZWRpdC10YWdzLnBocD90YXhvb9teT1jY3Rvc19jb3Vwb25fY2F0ZWdvcnkmcG9zdF90eXBIPWNjdG9yX2NvdXBvbg==

Now the final url to use will be

<https://www.wpoven.com/tools/try/plugin/coupon-creator?r=ZWRpdC10YWdzLnBocD90YXhvb9teT1jY3Rvc19jb3Vwb25fY2F0ZWdvcnkmcG9zdF90eXBIPWNjdG9yX2NvdXBvbg==>

The new url will not only create a demo , but also take user directly to the required page. When making a button or url , make it open in a new page (target=_blank) .
